

# Hack2Hire: AI-Powered Interview Hackathon

## AI-Powered Mock Interview Platform

### Problem Statement

In today's competitive hiring ecosystem, interview readiness is no longer just about subject knowledge – it is about adaptability, communication, time management, consistency, and performance under pressure.

Despite access to abundant learning resources, most students struggle during real interviews due to:

- Lack of realistic interview practice
- Unstructured or subjective feedback
- No measurement of performance under time pressure
- Inability to adapt to varying interview difficulty
- No clear indicator of interview readiness

Traditional mock interviews are often manual, inconsistent, and difficult to scale. As a result, many capable candidates fail not because of lack of skill – but due to lack of structured interview preparedness.

### The Challenge

Build an AI-Powered Mock Interview Platform that simulates a real-world interview environment using an AI Interviewer.

The system should evaluate a candidate based on their resume, job description (JD), responses, time management, and adaptability, and objectively measure interview performance using predefined rules – just like a real interviewer would.

Your AI Interviewer should not just ask questions, but think, adapt, evaluate, and decide.

### Key Capabilities Expected

Your solution should be able to:

- **Analyze Candidate Resume:** Extract skills, experience, projects, and role relevance
- **Accept Job Description (JD):** Align questions with role requirements
- **Ask Relevant Interview Questions:** Technical, conceptual, behavioral, and scenario-based

- **Varying difficulty levels (Easy → Medium → Hard)**
- **Adapt Question Difficulty Dynamically**
  - Increase difficulty for strong responses
  - Reduce or stabilize difficulty for weaker responses
- **Enforce Strict Time Constraints**
  - Fixed response time per question
  - Penalize over-time or incomplete answers
- **Early Interview Termination**
  - End interview early if performance falls below a defined threshold
- **Objective Scoring Mechanism**
  - Score answers based on:
    - Accuracy
    - Clarity
    - Depth
    - Relevance
    - Time efficiency
- **Generate Final Interview Readiness Score**
  - Overall readiness indicator (e.g., 0–100)
  - Categorized feedback (Strong / Average / Needs Improvement)

## Output Expectations

At the end of the interview, the platform should provide:

- Final Interview Readiness Score
- Performance breakdown by skill areas
- Strengths and weaknesses
- Actionable feedback for improvement
- Hiring readiness indicator for the given JD
- You can assume that JDs and Resume will be of some Tech Role only.

## Goal of the Challenge

This challenge evaluates:

- State-based simulation accuracy
- Adaptive decision-making logic
- Precision handling and edge cases
- Real-world interview performance modeling

This is **not about theory or memorization** – it's about simulating how interviews actually work.

## Submission Guidelines:

- Users must submit the **link to their GitHub repository** on the competition portal (Unstop, where you completed your hackathon registration).
- The **GitHub repository must be public**. Private repositories will lead to **disqualification**.
- Hosting the project is optional but will give you an edge during evaluation.
- **Mandatory:** Include a **screen-recording video of your live, working project** in the **README.md** of your GitHub repository.

## FAQs

### Q. What Tech Stack to use?

A. You can use any tech stack as per your expertise.

### Q. Can I use AI to build the solution?

A. Yes you can use AI Tools like ChatGPT, Emergent, Co-Pilot etc. to build the solution for rapid prototyping. But make sure you understand the platform that you have built.

### Q. Will I get a certificate?

A. Yes, but only if you have done a Valid Submission.

### Q. How much time do I have to make the submission?

A. Submission Deadline is **1st June, 2026 6:00pm**. You can check Unstop Portal.

### Q. I have more doubts, how can I contact the UnsaidTalks Team?

A. You can reach out @ +91-7303573374 on whatsapp or @ info@unsaidtalks.com if you have any doubts or feedback for us.
